# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

- Languages used in the current year and those desired to learn in the next year seem to be correlated
- Databases used in the workforce and those desired to learn overlap often
- Limited variety of platforms. Software is dominated by AWS, Microsoft Azure, Google Cloud
- Prioritization should be focused on top languages, databases, and web platforms to maintain workplace efficiency

# INTRODUCTION

---

- Purpose of Report: Deliver insights into trends between languages, databases, and web frames in the current year and next year
- Target Audience: Technical Management Teams and IT Executives
- Value of Report: Prioritize workforce perspectives on languages, databases, and web frames

# METHODOLOGY

---

- Utilized Stack Overflow API to access data
- Cleaned, Wrangled, and created initial visualizations
- Performed Exploratory Data Analysis
  - Found correlations
  - Removed duplicates, imputed missing values using most frequent value, drop mostly empty columns
  - Normalized salary data for numerical comparison
- Created Dashboard summarizing key trends

# PROGRAMMING LANGUAGE TRENDS

## Current Year

Top Ten Languages Used

## Next Year

Top Ten Languages Want to Work With

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- Top 10 languages currently used heavily dominated by HTML, C#
- Top 10 languages wanted to be worked with revolve around HTML and Python

## Implications

- Heavy correlation between languages currently used and those desired to learn
- HTML is viewed as a necessity in the workforce, and is reflected in desire to learn it

# DATABASE TRENDS

## Current Year

Top Ten Databases Used

## Next Year

Top Ten Databases Want to Work With

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- PostgreSQL is most popular database to use and to want to learn
- SQL databases maintain majority of Top Ten Databases
- Microsoft databases have strong presence

## Implications

- SQL and Microsoft database knowledge is critical in the workforce
- Desire to learn these databases indicates potential opportunity for learning platforms

# DASHBOARD

---

Dashboard Available At:

[https://github.com/thomasbarber21/IBM\\_Data\\_Analyst\\_Certification\\_Capstone\\_Project/blob/main/IBM\\_Professional\\_Data\\_Analyst\\_Certification\\_Dashboard.pdf](https://github.com/thomasbarber21/IBM_Data_Analyst_Certification_Capstone_Project/blob/main/IBM_Professional_Data_Analyst_Certification_Dashboard.pdf)

# DASHBOARD TAB 1

Top Ten Languages Used

Top Ten Databases Used

Top Ten Platforms

# DASHBOARD TAB 2

Top Ten Languages Want to Work With

Top Ten Databases Want to Work With

Platform Want to Work With

Webframe Want to Work With

# DASHBOARD TAB 3

Age of Respondent

Employment Status

Coding Activities

Education Level by Respondent ID

Responses by Country

# DISCUSSION

---

- Majority of respondents are college educated, work full time, and are primarily from the US
- Potential demographics limit conclusions from being made about broader audiences
- Thoughts and Questions?

# OVERALL FINDINGS & IMPLICATIONS

---

- Strong correlation between languages and databases used in the workforce and those desired to learn
- Potential bias in survey respondents, not representative of larger trends
- HTML, C#, SQL and Microsoft database knowledge is of high importance in the workforce and the eyes of learners

# CONCLUSION

---

- Strong desire to learn languages used in the workforce
- Strong desire to learn databases used in the workforce
- Heavy correlation between languages, databases, and web frame trends in the current and next year
- Prioritization should be placed on HTML, C#, SQL and Microsoft Databases for workplace satisfaction and efficiency

# JOB POSTINGS

---

# POPULAR LANGUAGES
